Description

Specifications:

- Thickness:90microns
- Matt finish
- Has adhesive liner
- For cotton - polyester blends
- Iron on at 150C for 10 seconds at medium pressure
- Remove liner when hot
- Maximum washing temperature at 60C
- Can overlap on top of other heat transfer*

*only overlap on products that specify it is possible. Refer to example below:

-Please note that before cutting the material, you must run the load of the worksheet by following the procedure of the cutter: MENU/LOADING and enter the correct size.

-Before cutting the material, ensure that you select MIRROR image of your design.

-During the FILM PEELING phase, remove the material in excess by the hand resting on the support and apply gentle pressure towards the outside.

-During the APPLICATION phase, after having the material pressed, we suggest to remove the support and to press the material again for another 5 or 10 seconds, covering it with silicon paper, in order to assure a greater resistance to washing.
