**General Product Information:** POI-PRINT 900 White Gloss P is a Monomeric PVC-Film (white gloss, 100 µm) laminated with a one-sided clay-coated silicone paper (135 g/m<sup>2</sup>) and equipped with a clear dispersion acrylic adhesive (permanent). Suitable for bonding various surfaces for example on commercial slabs, glass, metal or plastic. Especially suitable for the use on smooth as well as slightly curved surfaces. POI-PRINT 900 White Gloss P is ideal for short term presentation of advertising panels.  
**Product Advantages:** Very good opacity and flatness characteristics. Excellent dimensional stability. Fire classification B1 Certification and in accordance to DIN 4102-1 flame resistant adhered on steel surface. The film is resistant to the influence of solvent inks during the printing process and excellent printing results are guaranteed with all customary market ECO-Solvent, Solvent, UV and latex printers.  
**Processing Details and Printing Information:** The print must be completely dry before laminating, a minimum of 48 hours drying time is recommended. The surface which is to be laminated should be free from any impurities to achieve optimal adhesion to the digital printed film. Detailed printing settings and numerous ICC-Profiles can be found on our homepage [www.poi-tape.de](http://www.poi-tape.de). Additional suggestions and processing details can be downloaded from our homepage.  
**Transport & Storage:** 2 years if stored in original packaging at ca. 22° C and 50-55% relative humidity. Printed material should be completely dry and protected during transportation. Temperature and humidity fluctuations should be avoided.
